Programming Languages
- HTML
- CSS
- JavaScript

Tech Stack
- React
- Node.js
- Bootstrap
- jQuery

Tools & Databases
- Git
- GitHub
- VS Code

PROJECT EXPERIENCE

Wine Brand Website (Inspired by Louis XIII)

Skills Used: HTML, CSS, JavaScript

- Developed a luxury brand-inspired landing page focusing on smooth hover states, elegant button styles, and seamless slide transitions.
- Gained hands-on experience in responsive design and JavaScript-driven transitions, ensuring the website looks polished across devices.

Jewellery E-Commerce (Inspired by Bluestone)

Skills Used: HTML, CSS, JavaScript

- Built a category-based product page layout that dynamically shuffles when users scroll or drag, creating an engaging browsing experience.
- Learned to structure and style product cards effectively, improving my understanding of grid layouts and information hierarchy.

Netflix Clone

Skills Used: React, API Integration

- Developed a Netflix-inspired streaming platform clone to practice and understand API integration and data handling in React.
- Overcame challenges with state management and conditional rendering, strengthening my knowledge of React components and props.
